

Hello

See the below you tube link which will help you understand the new mobile app – there is also a pdf in the training area.

<https://www.youtube.com/embed/CDDksXfSmNM?autoplay=1>

Instructions: -

1. You will receive a text from Marley Comms:
2. Please click the link to download the app from the app/google store
3. Once downloaded go back to the original text and click configure
4. Then go to the app and at the bottom of the app swipe left, select settings and then go to Internet Calls (VoIP) and select All Networks

You can now use your phone for inbound and outbound calls without any charges to your mobile contract, showing your office number or direct dial, you can also transfer calls internally/externally and get to your centralised work contacts from your mobile phone application.

Thank you

The Marley Team

*We look forward
to being of service*
